

Storyteller by Promethium

Making everyone an expert at finding insights and interpreting results

CHALLENGES ORGANIZATIONS FACE

Skilled Resource Shortage

1000:1
Business Users to Data Pros
Overwhelmed Data Teams

Lack of Knowledge & Time

Don't know where to look for insights and no time to build reports and dashboards

1 Result, Many Interpretations

Struggle to determine what the results mean and get everyone on the same page

The AI Driven Automated Intelligence Solution

Automated Insight Suggestions

Make everyone an expert at finding insights. Storyteller provides suggested insights and auto generated visualizations.

Advanced Algorithms Made Easy

Storyteller executes your choice of insight-detection algorithms quickly against billions of rows of your data. Unlike other solutions, **your data does not need to be moved first.**

Natural Language Interpretation

Ensure everyone has the same understanding of results. Insights are described in a way everyone can understand so you can make faster, better informed decisions.

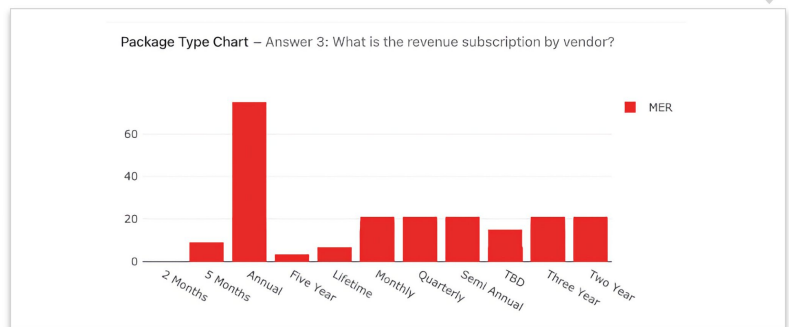

Storyteller Insights

what is revenue by subscription model

"Package type chart for the question what is the revenue subscription by vendor shows the revenue by package type. Maximum is 70 for package type annual."
